EDUCATION

UNIVERSITY OF MANITOBA
MS.c in Computer Science
Program Completion Aug 2020 | Winnipeg, Canada
Coursework: Parallel Computing, Online Algorithms, Graph theory & Cloud Computing.
Thesis: Blockchain for Vehicular Networks
Cum. GPA: 4.0 / 4.5

KARUNYA INSTITUTE OF TECHNOLOGY AND SCIENCES
B.Tech in Computer Science & Engineering
Grad. June 2018 | Coimbatore, India
Coursework : Data structures, Algorithms, Operating Systems, Computer Networks, Discrete Math & JavaScript.
Honors: Magna Cum Laude
Cum. GPA: 9.14 / 10.0

LOGOS HIGH SCHOOL
Grad. May 2013 | Awo-Omamma, Nigeria

SKILLS

TECHNICAL SKILLS
Proficient with:
Python • JavaScript(ES6) • React
Node.js • Hyperledger • MySQL
Git • Linux • LaTeX • Android Studio
Familiar with:
Machine Learning • PHP • Docker

SOFT SKILLS
Outstanding
Teamwork - from numerous research projects.

WORK EXPERIENCE

UNIVERSITY OF MANITOBA
Teaching Assistant
Fall 2019-December 2019 | Parallel Computing
- Advised students in this course on their projects and presentations.
- Spearheaded increase in efficiency of course curriculum by 30%.
- Received excellent feedback from the students.

TECHNICAL PROJECTS

BIOMEDICAL TEXT MINING | GITHUB
Sep 2017 - March 2018 | Coimbatore, India
- Built a Text Mining Framework with python that detects drug names in research papers using Machine learning algorithms such as CRF and naive Bayes.
- Facilitated a 45% improvement in efficient research into newer cancer drugs for the Chemistry department, Karunya Institute of Technology and Sciences.

VANET BLOCKCHAIN | GITHUB
Jan 2020 - August 2020 | Winnipeg, Canada
- Developed a trust inference model on the Hyperledger using node.js & python for secure communication in vehicular networks.
- improved the accuracy of calculating the credibility of an event message in the network by 50% using proximity to event location and beta priors.

SIZE-DENSITY TABLE BITCOIN MINING | GITHUB
Nov 2018 - Jan 2020 | Winnipeg, Canada
- Developed a Size-Density table (SDT) strategy using python for selecting cryptocurrency Transactions from the mempool.
- SDT improved on heap sort by reducing runtime from O(nlogn) to O(n) with comparable profit values on real-time bitcoin mempool data obtained from blockchair.com.

WEATHER FORECAST | WEBSITE, GITHUB
Summer 2020 | Winnipeg, Canada
- Built a web application using react for providing an 8 day forecast for any location a user inputs.
- Implemented geocoding by using the opencage API.

AWARDS

2019	University	Michael S. Doyle Graduate Award for Academic Excellence
2018	University	International Graduate Student Award Scholarship
2014	3rd/20	English Literary Drama Competition,Karunya Institute
2013	1st/160	Best graduating Student, Logos High School
2012	State Level	1st Nigerian National Mathematics Olympiad
2012	National	Nigerian National Biology Olympiad Finalist
